EZ-Nabbers

Ensuring safety for animal handlers, saving incredible amounts of time, and providing dozens of uses, the EZ Nabber is a very smart and sound investment. In addition to providing a safe and humane way to capture animals, aseptic intramuscular injections of tranquilizers, anesthetics and vaccines can be given through the net. Pets can be transferred from one cage to another without injury or stress to the animal or the practice staff. Pets can be removed from and/or placed in pet carriers. When the net becomes soiled, leave it on the frame and wash it in the tub with soap and water: use a disinfectant if needed. Abscesses and wounds can be flushed, and the pet can be bathed in the net. Our new 14" frame fits 18" x 18" cages.

ANIMAL NETS

Standard and Heavy Duty Dura-Flex Net

Dura-Flex Animal Nets are designed specifically to capture animals. They have the following features:

Solid nylon hoops. Provides strength and flexibility. These nets can be pressed firmly against the ground or wall to entrap animals even with the net shaft is at an angle. This allows handlers to stand upright while netting and restraining animals.

Long neoprene grips. Allows handlers to securely grab net shafts without slips, even when wet.

Woven 1/4" nylon mesh netting. Does not propagate tears, unravel, or weaken from adjacent tears. Net seams are surged with polyester thread, and small mesh size prevents animal entanglements.

Two layered 1/8" woven nylon hem. Most wear and tear suffered by animal nets is to the hem that attaches the net to the hoop. This design will easily handle abrasive surfaces like concrete.

Tie-off cords. Allows handlers to secure animals in the bottom of the net.

Heavy aluminum shafts. The 1" aluminum pipe shaft provides added strength and durability.

Standard Dura-Flex Animal Net

Standard Dura-Flex Animal Nets feature a 60" hoop circumference and 1/2" nylon hoop. This net works well for cats, small dogs, and similar sized animals.
